

A11101 295014

NAT'L INST OF STANDARDS & TECH R.I.C.

A11101295014

/Bulletin of the Bureau of Standards

QC1 .U5 V14:1918-19 C.1 NBS-PUB-C 1905

INDEX TO VOLUME 14

A.

- Aberrations of lenses, Axial, 341.
- Accuracy of measuring instruments, 741.
- Additions to the formulas for calculations of mutual and self inductance, 537.
- Alpha brass, Thermal expansion of, 571.
- Alternating-current measurements, 23.
- Ammonia, Vaporization of, 433.
- Ammonia, Liquid, 433.
- Aneroid calorimeter for specific and latent heats, 133.
- Antennas, Electrical oscillations in, 677.
- Application of dicyanin to the photography of stellar spectra, 487.
- Average eye for heterochromatic photometry, 87.
- Average eye, Relative sensibility of, 167.
- Arcs, Iron, cobalt, and nickel, 637.
- Axial aberrations of lenses, 341.

B.

- Bars for magnetic standards, 1.
- Beta brass, Thermal expansion of, 571.
- Bingham, E. C., Standard substances for the calibration of viscometers, 59.
- Bismuthinite, Photoelectric sensitivity of, 591.
- Black body and mechanical equivalent of light, 255.
- Brasses, Muntz metal, 571.
- Burns, K., Measurements of wave lengths in the spectrum of neon, 765.
- Burgess, G. K., Thermoelectric measurement of critical ranges of pure iron, 15.
- Burrows, C. W., An experimental study of the Fahy permeameter, 267.

C.

- Cadmium vapor, Electrons in, 479.
- Calculation of constants of Planck's radiation equation, 237.
- Calculations of mutual and self inductance, 537.
- Calibration, Gas interferometer, 473.
- Calibration viscometers, 59.
- Calorimeter for specific and latent heats, An aneroid, 133.
- Cell, Photoelectric, 507.
- Coblentz, W. W., Emissivity of straight and helical filaments of tungsten, 115.
- , Instruments and methods used in radiometry, 111.
- , The photoelectric cell and other selective radiometers, 507.
- , Photoelectric sensitivity of bismuthinite and various other substances, 591.
- , Luminous radiation from a black body and the mechanical equivalent of light, 255.
- , Relative sensibility of the average eye to light of different colors and some practical applications to radiation problems, 167.
- , Reflecting power of tungsten and stellite, 307.

- Coblentz, W. W., Spectroradiometric investigation of the transmission of various substances, 653.
- Cobalt arcs, 637.
- Colors, Sensibility of average eye to, 167.
- Comparison of a flicker and an equality-of-brightness photometer, 87.
- Conduction of metals at low temperatures, 301.
- Constants, Calculation of, 237.
- Critical ranges of pure iron, 15.
- Crittenden, E. C., An average eye for heterochromatic photometry, and a comparison of a flicker and an equality-of-brightness photometer, 87.
- Current transformers, 317.

D.

- Determination of the degree of uniformity of bars for magnetic standards, 1.
- Dicyanin, Application to photography of stellar spectra, 487.

E.

- Edwards, J. D., Gas interferometer calibration, 473.
- Electrical conduction of metals at low temperatures, 301.
- Electrical oscillations in antennas and inductance coils, 677.
- Electrical properties of silver sulphide, 331.
- Electromagnet moving coil galvanometers, 23.
- Electrons in cadmium vapor, 479.
- Emerson, W. B., Luminous radiation from a black body and the mechanical equivalent of light, 255.
- , Relative sensibility of the average eye to light of different colors and some practical applications to radiation problems, 167.
- , Reflecting power of tungsten and stellite, 307.
- , Spectroradiometric investigation of the transmission of various substances, 653.
- Emissivity of straight and helical filaments of tungsten, 115.
- Equality-of-brightness photometer, 87.
- Equation, Radiation, 237.
- Equivalent of light, Mechanical, 255.
- Expansion of alpha and beta brass, Thermal, 371.
- Experimental study of the Fahy permeameter, 267.

F.

- Fahy permeameter, 267.
- Filaments of tungsten, 115.
- Flicker and an equality-of-brightness photometer, 87.
- Foote, P. D., Some characteristics of the Marvin pyrheliometer, 605.
- , Resonance and ionization potentials for electrons in cadmium vapor, 479.
- Formulas for calculation of mutual and self inductance, 537.

G.

- Galvanometers, Electromagnet moving coil, 23.
 Gas interferometer calibration, 473.
Grover, F. W., Additions to the formulas for the calculation of mutual and self inductance, 537.

H.

- Heats, Specific and latent, 133.
 Helical filaments of tungsten, 115.
 Helium spectrum, 159.
 Heterochromatic photometry, 87.

I.

- Inductance coils, Electrical oscillations in, 677.
 Inductance, Mutual and self, 537.
 Infra-red spectra of iron, cobalt, and nickel, 637.
 Instruments used in radiometry, 111, 507.
 Instruments, Variance of measuring, 741.
 Interferometer, Calibration, 473.
 Investigation, Spectroradiometric, 653.
 Ionization potentials for electrons in cadmium vapor, 479.
 Iron arcs, Spectra of, 637.
 Iron, Critical ranges of, 15.

J.

- Jackson, R. F.*, Standard substances for the calibration of viscometers, 59.

K.

- Kiess, C. C.*, Wave length in the red and infra-red spectra of iron, cobalt, and nickel arcs, 637.

L.

- Latent heat of pressure variation of liquid ammonia, 433.
 Latent heat for vaporization of ammonia, Aneroid calorimeter for, 133.
 Least squares, An extension of the theory of, 237.
 Lenses, Axial, 341.
 Light, Mechanical equivalent of, 255.
 Liquid ammonia, Pressure variation of, 433.
 Liquid ammonia, Specific heat of, 397.
Long, M. B., Spectroradiometric investigation of the transmission of various substances, 653.
 Luminous radiation from a black body, 255.

M.

- Magnetic standards, Bars for, 1.
 Marvin pyrheliometer, 537.
 Measurement, Sensibility of average eye to, 167.
 Measurements, Alternating-current, 23.
 Measurements of wave lengths in the spectrum of neon, 765.
 Measurements on the index of refraction of air, 697.
 Measurements, Wave-length, 371.
 Measuring instruments, Variance of, 741.
 Mechanical equivalent of light, 255.
 Mechanical properties of Muntz metal brasses, 571.
Meggers, W. F., Measurements of wave lengths in the spectrum of neon, 765.
 —, Measurements on the index of refraction of air for wave lengths from 2218 Å to 9000 Å, 697.
 —, Wave lengths in the red and infra-red spectra of iron, cobalt, and nickel arcs, 637.
 —, Wave-length measurements in spectra from 5600 Å to 9600 Å, 371.

Merica, P. D., Thermal expansion of alpha and beta brass between 0 and 600° C. in relation to the mechanical properties of heterogeneous brasses of the Muntz metal type, 571.

Merrill, P. W., Application of dicyanin to the photography of stellar spectra, 487.

—, Measurements of wave lengths in the spectrum of neon, 765.

—, Wave lengths of the stronger lines in the helium spectrum, 159.

Metal, Muntz, 571.

Metals at low temperatures, Electrical conduction in, 301.

Method for testing current transformers, 317.

Methods used in radiometry, 111, 507.

Miller, J. M., Electrical oscillations in antennas and inductance coils, 677.

Moving-coil galvanometers, 23.

Muntz metal type, Brasses of, 571.

Mutual and self inductance, 537.

N.

Neon, Wave lengths in the spectrum of, 765.

Nickel arcs, 637.

O.

Osborne, N. S., An aneroid calorimeter for specific and latent heats, 133.

—, Latent heat of vaporization of ammonia, 433.

—, Specific heat of liquid ammonia, 397.

Oscillations in antennas and inductance coils, 677.

P.

Permeameter, Study of, 267.

Peters, C. G., Measurements on the index of refraction of air for wave lengths from 2218 Å to 9000 Å, 697.

Photoelectric cell, 507.

Photoelectric sensitivity of bismuthinite, 591.

Photography of stellar spectra, 487.

Photometer, Equality-of-brightness, 87.

Photometry, Heterochromatic, 87.

Planck's radiation equation, 237.

Potentials for electrons, 479.

Pressure variation of liquid ammonia, The latent heat of, 433.

Problems, Radiation, 167.

Properties of silver sulphide, 331.

Pure iron, Critical ranges of, 15.

Pyrheliometer, Marvin, 605.

R.

Radiation equation, Planck's, 237

Radiation, Luminous, 255.

Radiation problems, 167.

Radiometers, 507.

Radiometry, 111, 507.

Ranges of pure iron, 15.

Red and infra-red spectra of iron, cobalt, and nickel arcs, 637.

Reflecting power of tungsten and stellite, 307.

Relative sensibility of the average eye to light of different colors, 167.

Resonance and ionization potentials for electrons in cadmium vapor, 479.

- Richtmyer, F. K.*, An average eye for heterochromatic photometry, and a comparison of a flicker and an equality-of-brightness photometer, 87.
Roeser, H. M., Calculation of the constants of Planck's radiation equation: An extension of the theory of least squares, 237.

S.

- Sanford, R. L.*, Determination of the degree of uniformity of bars for magnetic standards, 1.
 —, An experimental study of the Fahy permeameter, 267.
Schad, L. W., Thermal expansion of the alpha and of beta brass between 0 and 600° C, in relation to the mechanical properties of heterogeneous brasses of the Muntz metal type, 571.
Scott, H., Thermoelectric measurement of critical ranges of pure iron, 15.
Schlink, F. J., Variance of measuring instruments and its relation to accuracy and sensitivity, 741.
 Self-inductance, 537.
 Sensibility of the average eye to light of different colors, and some practical applications to radiation problems, 167.
 Sensitivity of bismuthinite, 591.
 Sensitivity of measuring instruments, 741.
Shultz, H. I., Axial aberrations of lenses, 341.
Silsbee, F. B., A method for testing transformers, 317.
 —, Note on electrical conduction in metals at low temperatures, 301.
 Silver sulphide, Some electrical properties of, 331.
 Some characteristics of the Marvin pyrheliometer, 605.
 Specific heat of liquid ammonia, 397.
 Specific heats, 133.
 Spectra of iron, cobalt, and nickel arcs, 637.
 Spectra from 5600 Å to 9600 Å, 371.
 Spectra, Stellar, 487.
 Spectroradiometric investigation of transmission of various substances, 653.
 Spectrum, Helium, 159.
 Spectrum of neon, 765.
 Standard substances for the calibration of viscometers, 59.
 Standards, Magnetic, 1.

- Stellar spectra, 487.
 Stellite, Reflecting power of, 307.
 Straight filaments of tungsten, 115.
 Study of the Fahy permeameter, 267.
 Sulphide, Silver, 331.

T.

- Tate, J. T.*, Resonance and ionization potentials for electrons in cadmium vapor, 479.
 Testing current transformers, 317.
 Theory of least squares, 237.
 Thermal expansion of alpha and of beta brass, 571.
 Thermoelectric measurement of critical ranges of pure iron, 15.
Tillyer, E. D., Axial aberrations of lenses, 341.
 Transformers, Current, 317.
 Transmission of various substances, 653.
 Tungsten filaments, Reflecting power of, 307.

U.

- Uniformity of bars for magnetic standards, 1.

V.

- Van Dusen, N. S.*, Latent heat of vaporization of ammonia, 433.
 —, Specific heat of liquid ammonia, 397.
 Vapor, Cadmium, 479.
 Vaporization of ammonia, 433.
 Variance of measuring instruments and its relation to accuracy and sensitivity, 741.
 Variation of liquid ammonia, 433.
Vinal, G. W., Some electrical properties of silver-sulphide, 331.
 Viscometers, Calibration of, 59.

W.

- Wave lengths of the stronger lines in the helium spectrum, 159.
 Wave lengths in the red and infra-red spectra of iron, cobalt, and nickel arcs, 637.
 Wave-length measurements in spectra from 5600 Å to 9600 Å, 159.
 Wave lengths from 2218 Å to 9000 Å, 697.
 Wave lengths in the spectrum of neon, 765.
Weibel, E. A., Study of electromagnet-moving coil galvanometers for use in alternating-current measurements, 23.
